FemmeScience Has It Covered From Head to Toe with New Body Cream

FemmeScience releases revolutionary anti-aging body moisturizer that nourishes without feeling greasy.

MIAMI, FLORIDA – December 7, 2010 – A basic law of skincare is that everyone, no matter her skin type, should moisturize. Skin is an essential organ, and therefore it is of the utmost importance to take proper care of the skin and keep it healthy. Moisturized skin is healthy skin, as hydrated skin cells can aid in preventing damage and heal more effectively. Even oily skin will benefit from moisturizing, as oil alone doesn't deliver certain compounds necessary to keep skin sufficiently lubricated.

FemmeScience introduces its restorative **Body Cream**, a rich cream created to effectively moisturize skin, and maintain its health while also improving its appearance.

FemmeScience's Body Cream dramatically increases skin's moisture levels and restores its natural suppleness, leaving it silky smooth. The luxurious formula was scientifically developed by the experts at **FemmeScience** and infuses the skin with antioxidants like vitamins A, C, and E as well as grapeseed extract, pomegranate, green tea, and shea butter. The **Body Cream** helps protect skin from moisture loss while enhancing the skin's natural glow and evening out tone. Its restorative properties nourish skin and encourage cell renewal. Continued daily use will lead to velvety, supple, and beautiful skin. It's easy to apply, quickly absorbed, and leaves no greasy residue on the skin, while the conditioning and nourishing agents stay bound to the skin.

FemmeScience products are created with dermatological-grade ingredients to enhance the vitality and radiance of youthful skin. Balancing the science of a young woman's skin with the technological innovation required to preserve it for years to come, **FemmeScience** helps young women maintain the beauty of their skin while addressing concerns specific to them, including sensitivity, dryness, dullness, and the very first signs of aging. **FemmeScience** stands alone as an effective and modern skincare line that focuses specifically on skin preservation and is specially formulated for youthful skin. The complete product line is available at www.femmescience.com or by calling **1-877-336-6325**.
