Green with Skincare Envy

MIAMI, FLORIDA – July 15, 2010 – We’ve all heard over and over again—green tea is like a miracle substance for your body and overall health. But what you may not know is that green tea can do miracles for your skin. The skincare experts at **FemmeScience** have developed a new **Face Mask** that uses the millenary power of nature in the active forms of green tea, clay and essential oils to purify, cleanse and revitalize the face. Green tea health properties have been recognized by innumerable studies and entire civilizations have used it as a medicinal and cleansing ingredient. The leaves of the green tea plant are rich in antioxidants, catechins and chlorophyll making it ideal to refresh, revitalize and soften the skin.

FemmeScience’s Face Mask uses pulverized organic Japanese matcha green tea, the same kind that’s so special it is also used in the traditional Japanese tea ceremony. When applied to the skin, the natural active ingredients can actually be felt working as they absorb impurities and pore-clogging residues. When the mask is rinsed away, it leaves the skin saturated with catechins and antioxidants for a glowing and firm appearance. In addition to green tea, the **Face Mask** incorporates a mix of purified organic bentonite and kaolin clays, and organic essential oils of camphor and grapeseed.

FemmeScience products are created with dermatological-grade ingredients to enhance the vitality and radiance of youthful skin. Balancing the science of a young woman’s skin with the technological innovation required to preserve it for years to come, **FemmeScience** helps young women maintain the beauty of their skin while addressing concerns specific to them, including sensitivity, dryness, dullness, and the very first signs of aging. **FemmeScience** stands alone as an effective and modern skincare line that focuses specifically on skin preservation and is specially formulated for youthful skin. The complete product line is available at www.femmescience.com or by calling **1-877-336-6325**.
